

```
public class Gugus extends Applet {
    public void init() {
        A aa  = new B();
        A[] a = new B[5];
        a[0]  = new B();
        a[1]  = new A();      // ArrayStoreException!
        B b0  = (B)a[0];
        B b1  = (B)a[1];      // TypeCastException!
    }
}

class A {}
class B extends A {}
```
